## Motorcycle Sticker Tag Mounting Instructions

---

For the BC-PASS to work properly on a motorcycle, it must be mounted on a relatively flat or **minimally curved surface**, such as the windscreen, fairing or non-metal front fender. The BC-PASS can be affixed to the outside of a rearview mirror if the housing is not metallic. The tag must be oriented horizontally on whichever location is selected.

Examples of where the BC-PASS can be mounted include:

- the lower center area of the windshield/windscreen\*
- the top or upper area of the headlight cover if the headlamp lighting is not obstructed

\*when installing on the windshield/windscreen it is important to not obstruct the operator's field of view

**IMPORTANT:** The BC-PASS **cannot be affixed to any metal attachments**, such as metal fenders, forks, handlebars, or crash bars. Doing so will render the BC-PASS inoperable.

**Step 1.** Identify the area to affix the BC-PASS tag in a horizontal orientation.

**Step 2.** Clean and dry area where BC-PASS is to be affixed. A clean surface assures proper adhesion.

**Step 3.** Peel and remove the backing from BC-Pass, **DO NOT BEND** the *BC-Pass*.

**CAUTION:** Do not attempt to relocate a sticker transponder once it has been installed.  
It will break and become unusable.

If the sticker tag is damaged, it cannot be re-used, please visit, or contact our Customer Service Walk-In Center to obtain a replacement.
